

Capture the essence of any session or document - and put it into action

- Digitalize note taking and action planning from any session, meeting or document
- Get an overview of what was relevant and easily find your favourite documents
- Involve others in action planning and transfer of learning
- Generate KPI's for your own learning and track execution

Features

- ActExs helps you capture all your key learnings from training sessions, meetings or even key documents. You create notes, (text, voice, photos, sentiments & actions) attached to any slide that is presented or flip chart that is developed.
- You can track the execution and make sure that things get done.
- ActExs can be adapted to your corporate design and modified to your special requirements.
- Whether mail annotations or plain slides, complete presentations or just the stuff you found useful to yourself or your team members.
- Define action items and track the progress within the app.
- Generate key performance indicators for all sessions you attend.
- It can be used individually or as a corporate package – no need to integrate it into your IT system.
- In a later version, corporate wide anonymous analysis of key data will be available in order to evaluate sessions.

Effort

- Reflection of content

Technology

- Hybrid App (iOS / Android)
- BringYourOwnDevice enabled
- Interfaces via pdf and ics files

What it can do for you:

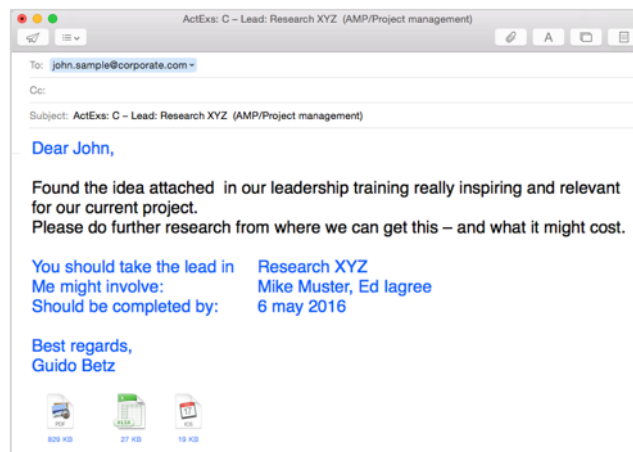

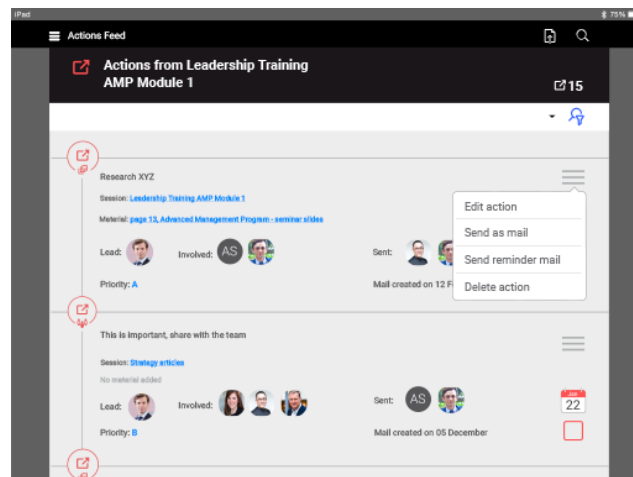

- You upload all handouts or session material as PDF documents to ActExs - either through a QR-code, a browser link, E-Mail or directly from your device. Annotate any slide, while following a presentation. Integrate documents or charts from your mobile devices, and attach drawings, text passages, as well as audio to a slide. No more notes are lost!
- After reflecting on the session, mark what inspires you; what was a great idea that you want to research further - or what was irrelevant. Mark your favourite slides to easily retrieve them later. You can also get an overview of your comments here.
- You decide on how to take action: who should take the lead, who to involve, and when to set deadlines; extend these actions through the provision of attachments, like PDF slides and ICS files (to be incorporated into any calendar), - everything can be done directly through the App. You can also use it as a digital leadership tool.

Business case

- Save all costs for printing, binding and distributing of handouts
- Get more **Return On Learning** from action plans that are executed well: from reflection to action.

Application case:

- Leaders use it to take notes in any meetings they attend and create action plans.
- HRD departments evaluate the effectiveness of learning transfers in large programs.

Technical features:

- Read and annotate PDFs ✓
- Works offline on mobiles & tablets ✓
- No system integration needed ✓
- Works with every mail app ✓
- BYOD enabled ✓
